PROFILE

MCA student with a strong foundation in Object-Oriented Programming, MVC architecture, and relational database design. Delivered multiple full-stack applications covering role-based authentication, CRUD operations, and REST APIs. Transitioning this robust backend foundation into the .NET ecosystem with active project experience in C#, ASP.NET Core, and Entity Framework, alongside AI integration using Python..

TECHNICAL SKILLS

- **Programming Languages:** C#(.Net Framework),Java, Python, C++
- **Backend Concepts:** MVC architecture, REST API design, session management, CRUD operations (applied via Servlet/JSP, Spring Boot)
- **Frontend:** HTML5, CSS3, JavaScript, React.js
- **Database:** MySQL, SQL, MySQL Workbench, JDBC
- **Tools:** Eclipse IDE, VS Code, Apache Tomcat, Git/GitHub, Postman

PROJECTS

AI-Powered Stock Market Predictor | Python, Java, React.js, MongoDB, REST API, Spring Boot

- Designed and developed a full-stack stock analysis platform using a backend API and React.js for an interactive, real-time frontend dashboard.
- Integrated a Python-based machine learning model to analyze historical stock data and predict market trends, passing analytical data to the backend via REST APIs.
- Built a secure relational database schema to manage user portfolios, stock watchlists, and historical pricing data.

Student Admission Portal | Java, JSP, Servlet, JDBC, MySQL, REST API

Dec 2025 – Apr 2026

- Designed and deployed a full-stack admission management system handling student registration, application submission, and real-time status tracking — an MVC pattern directly analogous to ASP.NET MVC/Core.
- Built an admin panel managing 200+ student applications with an approval/rejection workflow and audit log.
- Integrated a MySQL database via JDBC for secure data handling — schema and query design transferable to Entity Framework/ADO.NET.
- Implemented role-based authentication (admin/student), session management, CRUD operations, and client-side form validation.

College ERP System | Java, Spring Boot, JDBC, MySQL, REST API, AWT

Sep 2024 – Nov 2024

- Developed a desktop-based ERP system for managing students, faculty, courses, attendance, and academic records.
- Built a GUI using Java Swing components (JFrame, JTable, JButton, JTextField, JComboBox, JMenuBar).
- Connected the application to MySQL via JDBC for data management.
- Implemented CRUD operations and event-driven functionality for efficient college administration.

EDUCATION

Master in Computer Application

2025 – Present

P R Pote College of Engineering and Management, Amravati

Bachelor of Computer Applications

2022 – 2025

Smt. Kesharbai Lahoti College, Amravati

ACHIEVEMENTS

- NPTEL Certification — Fundamentals of Object Oriented Programming (2026).
- Developed 3 full-stack Java projects with strong understanding of OOP and database management.
- Actively upskilling in C# and the .NET ecosystem to extend existing OOP/backend expertise.
